Office Action Summary

Application No.

10/090,139

Applicant(s)

KUEON, YOUNG-SU

Examiner

Chong H. Kim

Art Unit

3682

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 28 February 2005.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1 and 4-8 is/are pending in the application.
- 4a) Of the above claim(s) 4-8 is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- 1) ☐ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☒ Information Disclosure Statement(s) (PTO-1449 or PTO/SB/08)
Paper No(s)/Mail Date 2/28/05.
- 4) ☐ Interview Summary (PTO-413)
Paper No(s)/Mail Date. _____.
- 5) ☐ Notice of Informal Patent Application (PTO-152)
- 6) ☐ Other: _____.

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on Nov 19, 2004 has been entered.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Wolf, U.S. Patent 4,375,944.

Wolf shows, in Figs. 1-5, an oil pickup apparatus 30 for a hermetic compressor connected with a crank shaft 20 in order to pickup an oil 22 filled up in a lower part of a shell 14, comprising an oil pickup tube 32 having one end 38 immersed in the oil and being connected with the crank shaft to be rotated together, and the oil pickup tube having an impeller portion 34 integrally formed at the oil pickup tube in order to pickup the oil by a centrifugal force when the crank shaft rotates and supply the oil to an upper part of the compressor wherein an eccentric

Art Unit: 3682

portion (as partially shown in the upper housing 12 in Fig. 1) connected with a connecting rod is disposed at an upper end of the crank shaft, and the oil pickup tube is connected with a lower end of the crank shaft; and

wherein the impeller portion includes a plurality of unit processing portions having a depressed outer circumference 46, 48 of the oil pickup tube and a protruded corresponding inner circumference 40, 42.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Wolf, U.S. Patent 4,375,944 in view of Abe, U.S. Patent 4,236,879.

Wolf shows, in Figs. 1-5, an oil pickup apparatus 30 for a hermetic compressor connected with a crank shaft 20 in order to pickup an oil 22 filled up in a lower part of a shell 14, comprising an oil pickup tube 32 having one end 38 immersed in the oil and being connected with the crank shaft to be rotated together, and the oil pickup tube having an impeller portion 34 integrally formed at the oil pickup tube in order to pickup the oil by a centrifugal force when the crank shaft rotates and supply the oil to an upper part of the compressor wherein an eccentric portion (as partially shown in the upper housing 12 in Fig. 1) connected with a connecting rod is

Art Unit: 3682

disposed at an upper end of the crank shaft, and the oil pickup tube is connected with a lower end of the crank shaft;

wherein the impeller portion includes a plurality of unit processing portions having a depressed outer circumference 46, 48 of the oil pickup tube and a protruded corresponding inner circumference 40, 42;

wherein the plurality of unit processing portions are disposed in a circumferential direction of the oil pickup tube and each of the portions is at the same angle;

wherein the plurality of unit processing portions are disposed around an outer circumference of the oil pickup tube and evenly spaced apart around a radius of the oil pickup tube; and

wherein the plurality of unit processing portions are closed between the outer circumference and the inner circumference of the oil pickup tube;

but fails to show the depressed portions formed at a sloped angle from the longitudinal direction.

Abe shows, in Figs. 7-10, an oil pickup tube 21 for a hermetic compressor comprising a plurality of unit processing portions 21f having a depressed outer circumference and a protruded corresponding inner circumference which are formed for a predetermined length to be sloped for a predetermined angle in a longitudinal direction of the oil pickup tube.

It would have been obvious to a person of ordinary skill in the art at the time the invention was made to modify the longitudinally directed unit processing portions of Wolf in view of the sloped unit processing portions as taught by Abe in order to increase the pickup rate

Art Unit: 3682

of the oil so that more lubricant can be delivered to the working mechanism to increase the life expectancy of the device.

Response to Arguments

6. In response to the applicant's argument that Abe reference fails to teach the unit processing portions disposed around an outer circumference of the pickup tube, evenly spaced apart, and the portions are closed between the outer and inner circumference, it is the Examiner's view that Wolf reference teaches all of the above deficiencies mentioned. The reference by Abe is applied to teach what is lacking in the reference by Wolf. Wolf shows every limitations as recited in claim 1 except the angled or sloped unit processing portions. Abe is applied to show that it would have been obvious to a person of ordinary skill in the art at the time the invention was made to modify the straight unit processing portions of Wolf with the angled/sloped unit processing portions as taught by Abe in order to increase the flow of the lubricant along the tube.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Chong H. Kim whose telephone number is (571) 272-7108. The examiner can normally be reached on Tuesday - Friday, 7:00 - 5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David A Bucci can be reached on (571) 272-7099. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
